

PBG-6004 Oxygen Regulator Field Tester

Manufactured by....

Powering Business Worldwide

Blue Aerospace is pleased to offer Eaton's next-generation Pressure Breathing Gravitational (PBG) force oxygen regulator field tester (model PBG-6004), a portable microprocessor-controlled tester for organizational level maintenance of panel mounted aircraft breathing regulators.

The PBG-6004 offers many functional enhancements over the legacy tester while enabling depot level maintenance not previously available under current configurations.

PBG-6004 Oxygen Regulator Field Tester

Contact info@blueaero.com for more information.

Key Enhancements:

- ✓ Addresses “false failure” issues experienced with legacy testers
- ✓ Touch screen and “user-friendly” pictorial guides the operator through the testing sequence
- ✓ Enhanced data capture/retrieval, including a scannable QR code containing all applicable test data
- ✓ Data recall features allow the user to search for a specific set of data using fields collected during testing

Equipment	CRU -73/-92	CRU -93/-98	CRU -60	CRU -94/-120
Tests:				
Air check valve	X	X		
Suction flow	X	X		
Air ratio-shut off	X	X		
Blinker flow	X	X		
PBG, high-low compensated relief valve		X		
Max flow	X	X		
Mask pressure	X	X		
Demand valve leakage	X	X		
Outward leakage	X	X	X	X
Relief valve				X
