Blue Aerospace is proud to serve as the exclusive distribution partner for Eclipse International, the premier provider of Automated Test Equipment (ATE) and complete testing solutions for the full spectrum of electrical components.

Eclipse ATE systems reduce testing cycles to a fraction of the time required by legacy equipment and are fully scalable to accommodate an infinite amount of test points.

With over 20 years of experience, Eclipse systems are fully field tested and in current operation throughout all branches of the US Military and select foreign organizations.

Why Choose Eclipse ATE Systems?

- ✓ Reduces days of troubleshooting down to minutes
- ✓ Provides comparison (event to event) data for fault trend analysis
- ✓ Fully scalable for use at O, I & D Maintenance levels
- ✓ Provides portable option for in-field test and troubleshooting
- ✓ Certified for use in extremely harsh (MIL-PRF-28800 Class I & II) and explosive atmosphere (MIL-STD-810) environments
- ✓ Proven and deployed within all branches of US Military
